

Dear Sir or Madam

Good Day, I am a self-taught programmer currently living in South Africa. When I turned 20, I decided to challenge myself and learn something new. I picked programming because I have always been a tech geek but had no idea how to write any code. I only had experience with HTML and CSS from high school. I began with Python because everyone recommended it for beginners and after a while, I absolute it loved it and I was eager to learn more. Once I learned the core programming principles, I was able to easily pick up other languages, but Python remains my favorite.

At only 20 years old, I have dedicated significant time and effort to developing my programming abilities. Through self-study and hands-on projects, I have acquired proficiency in many programming languages like Python, JavaScript, Typescript, C#, Java, PHP and C++ as well as experience with popular frameworks like Flask, ReactJs, NodeJs, Django, Angular and .NET framework. My passion for programming extends beyond just the technical aspects; I am constantly seeking opportunities to learn and stay up-to-date with the latest industry trends and try out many different careers such as Cybersecurity, Web Development, Developing software applications, Data Science and the big one, Artificial Intelligence.

I have an education background; I did my first year at North West University studying BCOM in Business Management in 2021 but later dropped out as I was not passionate about it, it just didn't feel right to me. While I may not have a degree in Computer Science or IT, my self-motivation and determination have enabled me to acquire a comprehensive understanding of programming concepts and methodologies. I have honed my problem-solving skills through various personal projects, where I have successfully tackled many challenges that have convinced me that I have chosen the right path for me and my future.

I believe that my combination of technical expertise, self-driven nature, and passion for programming makes me a good candidate for the advertised position. I am confident that my skills and enthusiasm will align with your company's goals and vision. I would welcome the opportunity to discuss in more detail how I can contribute to your team and make a positive impact.

Thank you for considering my application. I have attached my resume/CV for your review.

Yours sincerely,

Kofi Ramsey Arthur
